Professional Specialisation Studies

Business Engineering

30 ECTS credits (September - February)

Description:
The Business Engineering professional specialisation studies are designed to respond to the needs of business life in the field of engineering. The aim of the course is to educate engineers to work in various areas of the business environment and provide the expertise required in international companies. The main focus of the course is thus on the skills needed for managing the business based in technology, especially taking into account the demands and opportunities of the global market.

Scope: 30 ECTS credits

Duration: 5 months, September - February
The programme is carried out as part-time studies on weekends.

Curriculum: [www.oamk.fi/tekniikka/business](http://www.oamk.fi/tekniikka/business)

Topics:

Application: April - May, for more details see [www.oamk.fi/english](http://www.oamk.fi/english)

Prerequisites:
A relevant first-cycle/Bachelor’s degree in engineering or other applicable higher education degree. An applicant’s business experience is considered to be an advantage. Undergraduate students from Oulu UAS’ School of Engineering’s partner universities can apply, but they are required to have a suitable study background and a minimum of 2 years studies at their home university. A good command of English is required.
